Out and Up Receives Grant to Fund After-School and Summer Enrichment Services

Macon, Georgia January 31, 2007-Out and Up, Inc. has received a \$10,000.00 grant from the Community Foundation of Central Georgia. This grant will be used to help fund both Out and Up's after-school program and its Summer Enrichment Program. Both programs are outreach initiatives in keeping with the organization's mission, which is to provide services to the community that will enhance its physical, educational, emotional, and spiritual development. While the after school program focuses largely on academic assistance, the summer enrichment program has both an academic, cultural, and character component with field visits and outside activities which supplement the instruction.

Operated as Joshua House After-School and Summer Enrichment Program, the program is based at the Hester Bivins Center and focuses its outreach largely to children from low and moderate income families.

The mission of Out and Up, Inc. is to provide services to the community that will enhance its physical, educational, emotional, and spiritual development.
